

A REVIEW AND SYNTHESIS OF AUSTRALIAN FISHERIES HABITAT RESEARCH

MAJOR THREATS, ISSUES AND GAPS IN KNOWLEDGE OF COASTAL AND
MARINE FISHERIES HABITATS - A PROSPECTUS OF OPPORTUNITIES FOR THE
FRDC "ECOSYSTEM PROTECTION PROGRAM"
VOLUME 2: SCOPING REVIEW

Mike Cappel, Daniel M. Alongi,
David McB. Williams and Norman Duke

PRODUCED AT THE REQUEST OF THE
FISHERIES RESEARCH & DEVELOPMENT CORPORATION
FRDC 95/055

AUSTRALIAN INSTITUTE OF MARINE SCIENCE
FEBRUARY 1998

Contents

ISSUE 1: NATURAL DYNAMICS IN FISHERIES HABITATS AND ENVIRONMENTAL VARIABILITY	13
1.1 Overview and FRDC role	13
1.1.1 The issues	13
1.1.2 The literature	19
1.1.3 FRDC action	28
1.2 Major forcings shape habitat dynamics - currents, tides, geomorphology and climate	34
1.2.1 Effects of the environment on fisheries	44
1.2.2 The nature of disturbance	53
1.2.3 Fisheries ecosystem management, bioregionalisations and the National Representative System of Marine Protected Areas	53
1.3 Fisheries-habitat links	69
1.3.1 Key issues	69
1.3.2 Lack of regional overviews of pattern and process in fisheries production	71
1.3.3 The use of production figures in assessing the state of fisheries habitats	81
1.3.4 Lack of knowledge of links between life-histories and habitats	86
1.3.5 The concepts of “estuarine dependence”, “estuarine opportunism” and “critical habitats”	95
1.4 An overview of processes, connectivity and production in the major fisheries habitats	100
1.4.1 Coastal freshwater	101
1.4.1.1 Fishery-habitat links	104
1.4.2 Saltmarsh (and saltpan)	106
1.4.3 Mangroves	109
1.4.3.1 Fishery-habitat links	119
1.4.4 Seagrasses	121
1.4.4.1 Fishery-habitat links	132
1.4.5 Sheltered coasts and estuaries	138
1.4.5.1 Fishery-habitat links	142

1.4.6 Open coasts - sandy shores	160
1.4.6.1 Fishery-habitat links	163
1.4.7 Open coasts - hard substrata	166
1.4.7.1 Fishery-habitat links	167
1.4.8 Coral reefs	170
1.4.9 Continental shelves	172
1.4.9.1 Fishery-habitat links	174
 ISSUE 2: CHANGES TO DRAINAGE AND HABITAT ALTERATION	177
2.1 Overview and FRDC role	177
2.1.1 The issues	177
2.1.2 The literature	181
2.1.3 FRDC action	185
2.2 Coastal floodplains and wetlands - most vulnerable habitats?	195
2.2.1 The acid sulfate soil problem	196
2.2.2 Wetland loss	200
2.3 Estuarine “Environmental Flows” of freshwater	206
2.3.1 Barriers and alienation of habitat	209
2.3.2 The need for FISHWAYS	215
2.4 Saline intrusion and salinisation of estuaries	216
2.5 Training walls and channel modifications alter tidal and wave forcing	218
2.5.1 Lagoon opening regimes - foregone fisheries production due to opening or closure	219
2.6 Canal estates	221
2.7 Sediment instability, seagrass dieback and “narrow-banding”	222
2.8 Habitat rehabilitation, restoration and creation	225
 ISSUE 3: NUTRIENT AND CONTAMINANT INPUTS	241
3.1 Overview and FRDC role	241
3.1.1 The issues	241
3.1.2 The literature	246
3.1.3 FRDC action	253
3.2 Effects on ecosystems - seagrass dieback, algal blooms and the need for biomonitors	260
3.2.1 Regional variability	266
3.2.2 Biomonitors and the symptoms of eutrophication - the need for innovation	268

3.3 Effects on ecosystems - de-nitrification cycles and phytoplankton blooms	271
3.3.1 Mangroves as nutrient scrubbers	272
3.3.2 Key uncertainties	272
3.3.3 Toxic and nuisance phytoplankton blooms	274
3.4 Contaminants and pathogens	278
3.4.1 Hydrocarbons	278
3.4.2 Metal contamination	279
3.4.3 Organochlorines and organometals	281
3.4.4 Sewage plumes	282
 ISSUE 4: EFFECTS OF HARVESTING ON BIODIVERSITY AND ECOSYSTEMS	 285
4.1 Overview and FRDC role	285
4.1.1 The issues	285
4.1.2 The literature	286
4.1.3 FRDC action	291
4.2 Bycatch and incidental take	296
4.2.1 Gillnetting - interactions with “charismatic megafauna” and bycatch issues	297
4.2.2 Trawling and scallop dredging	300
4.2.3 Bycatch in other fisheries -- estuarine angling, trawling and pocket-netting -- bycatch of juveniles of important species	307
4.2.4 Shoreline harvesting	309
4.2.5 Bycatch in other fisheries - longlining	310
4.3 Habitat damage	311
4.4 Secondary effects of discards	315
4.5 Indirect effects of the reduction of target species and habitat damage	316
4.5.1 Species shifts on reefs	316
4.5.2 Indirect effects of the reduction of target species and habitat damage -- species shifts on trawl grounds	319
4.5.3 Indirect effects of the reduction of target species - competition with predators for food fishes	322
4.6 Changes in demography under fishing pressure	323
4.7 Generation of litter and the environmental consequences	324
4.8 Reducing the effects of fishing	325
4.9 Assessing the effects of fishing	328

ISSUE 5: INTRODUCED AND TRANSLOCATED PESTS AND DISEASES	333
5.1 Overview and FRDC role	333
5.1.1 The issues	333
5.1.2 The literature	340
5.1.3 FRDC action	343
5.2 Ballast water and hull-fouling organisms -- ship-vectored threats to mariculture and temperate fisheries habitats	346
5.2.1 Toxic and nuisance dinoflagellate blooms - a threat to mariculture	347
5.2.2 Marine pests that alter ecosystem structure	348
5.2.3 Disease	354
5.3 Translocated fishes and introduced pests in lower catchments	357
5.3.1 The role of habitat disturbance	357
5.3.2 Translocated fishes	360
5.3.3 Noxious aquatic macrophytes, woody weeds and pasture grasses	361
GLOSSARY OF ACRONYMS	369
APPENDICES	
Appendix 1: Standing Committee on Fisheries and Aquaculture - Fisheries Environment and Health Committee Terms of Reference (Hamdorf 1994)	373
Appendix 2: Fisheries Environment and Health Committee Research Priorities Draft (June 1996) see Hamdorf (1994)	374
Appendix 3: A Collation of Investment by THE FRDC in Projects with some Focus on Issues covered in this Review	377
Appendix 4: Summary of results of fisheries-habitat studies in inshore bays and estuaries, by Region, location, habitat type, fisheries taxa, life-history stage and source	393
Appendix 5: Summary of results of fisheries-habitat studies on rocky coasts and reefs, by region, location, habitat type, fisheries taxa, life-history stage and source.	418
Appendix 6 :Summary of results of fisheries-habitat studies on continental shelves, by region, location, habitat type, fisheries taxa, life-history stage and source.	431

Tables, Figures and Boxes

Table 1.1.1	Breakdown of literature from the entire bibliography by number of papers containing specific information on natural dynamics and fisheries links.	20
Table 1.1.2	Breakdown of literature from the entire bibliography by number of papers containing specific information on natural dynamics and threats.	20
Table 1.1.3(a)	Selected references documenting or invoking major sources of variation in fisheries-habitat links by habitat type.	25
Table 1.1.3(b)	Selected references documenting or invoking major sources of variation in fisheries-habitat links by habitat type.	27
Table 1.1.4	Summary of Major Opportunities for FRDC investment in addressing R&D Gaps in knowledge of “Natural Dynamics”.	31
Table 1.2.1	Distribution of estuarine wetlands in tropical and subtropical Australia with extreme tide range.	35
Table 1.2.3.1	Descriptions for IMCRA regions.	61
Table 1.2.3.2	Examples of the detailed attribute data for IMCRA regions.	66
Table 1.3.2.1	Similarity in composition of major target families in nearshore fin-fisheries of Australia.	73
Table 1.3.2.2	Comparison of rank occurrence in numerical terms of taxa in studies done in estuarine and marine embayments at similar latitudes in southern Australia.	76
Table 1.3.2.3	Comparison of commercial and recreational catch (t yr^{-1}) and production ($\text{kg Ha}^{-1} \text{ yr}^{-1}$) from Victorian, NSW and WA bays, inlets and estuaries.	79

Table 1.3.2.4	Differences in area of habitat and estimated total (commercial + recreational) finfish production (tonnes) from the Clarence and Richmond Rivers.	80
Table 1.3.2.5	Comparison of biomass estimates (grams metre ⁻²) from habitats within estuaries in the tropics and sub-tropics, using a variety of gears (see Appendix 4).	81
Table 1.3.4.1	Variation amongst species within genera, and within species amongst regions in requirements for nursery habitats.	91
Table 1.3.5.1	Classification of Western Australian commercial catch by life-history category.	97
Table 1.4.3.1	Mangrove distributions in Australia (Primary source: Duke 1992).	112
Table 1.4.3.2	Structure, morphology and phenology of mangrove (Primary source: Duke 1992).	114
Table 1.4.4.1	Seagrass distributions in 5 regions and 12 sub-regions in Australia. Species ordered by distributional range in northern and southern regions.	123
Table 1.4.4.2	Summary of structure, morphology and phenology of seagrass in Australia.	125
Table 1.4.5.1	Examples of fish community studies in temperate, sub-tropical and tropical bays and estuaries at different spatial and temporal scales, and with different gear types.	155
Table 1.4.7.1	Some hypotheses invoked to explain variation within the production of invertebrate fisheries of exposed coasts (from Lewis 1986, Caputi <i>et al.</i> 1995a, Shepherd 1990).	168
Table 2.1.1	Selected literature on coastal changes to drainage and habitat modification - documentation or effects on fisheries production and fisheries habitats.	183
Table 2.1.2	Summary of major opportunities for FRDC investment in addressing R&D gaps in knowledge of "Changes to Drainage and Habitat Alteration".	193

Table 2.2.2.1	Estimated areas (Ha) of saltmarsh/saltpan habitat altered in Australian States.	202
Table 2.2.2.2	Estimated areas (Ha) of mangrove habitat altered in Australian States.	202
Table 2.2.2.3	Estimated change in area (Ha) and rate of change in some wetland areas in Queensland.	203
Table 2.2.2.4	Estimated areas (Ha) of seagrass habitat altered in Australian States.	204
Table 2.3.1	Economically important fishes of coastal freshwaters threatened by changes to drainage.	209
Table 2.8	Status of fisheries habitat restoration, rehabilitation and creation projects on the Australian coast.	234
Table 3.1.1	Selected literature on the effects of nutrients and sediments in the coastal zone, by broad region or habitat type.	249
Table 3.1.2	Selected literature on the effects of contaminants in the coastal zone, by contaminant type and broad region or habitat type.	251
Table 3.1.3	Summary of major opportunities for FRDC investment in addressing R&D gaps in knowledge of “Nutrient and Contaminant Inputs”.	258
Table 4.1.1	Summary of Australian studies relevant to “Effects of Harvesting on Ecosystems and Biodiversity”.	289
Table 4.1.2	Summary of major opportunities for FRDC investment in addressing R&D gaps in knowledge of “Effects of Harvesting on Ecosystems and Biodiversity”.	295
Table 5.1.1	Summary of literature on effects on fisheries and mariculture of introduced and translocated pests.	342
Table 5.1.2	Summary of major opportunities for FRDC investment in addressing R&D gaps in knowledge of “Introduced and Translocated Pests”.	345

Table 5.3.1	Habitat Disturbances and their possible roles in establishment and transfer of introduced pests in freshwaters.	359
Table 5.3.2	Summary adapted from Finalyson <i>et al.</i> (1996) of priority pest species in the LWRRDC “Wetland R&D Program Scoping Review” and strategies for R&D.	364
